Professional Summary

Strategic QA & Program Leader with 14 years of experience driving AI innovation, digital transformation, and cross-functional execution across regulated industries. Expert in leading end-to-end programs for GenAI/ML initiatives, stakeholder alignment, KPI definition, and operational scaling. Proven success in implementing automation frameworks, responsible AI practices, and enterprise-wide enablement strategies across healthcare, e-commerce/retail, HRtech, and EdTech domains.

Program & Operational Leadership Highlights:

- Drove cross-functional execution of prioritized AI use cases by aligning stakeholders, tracking KPIs, and allocating IT resources.
- Leveraged DORA metrics principles to redesign QA and release workflows, improving cross-team collaboration and defect resolution velocity.
- Trusted partner to executive leadership for change management, test governance, and strategic alignment in regulated, fast-paced environments.

Work Experience

Lead QA and Program Manager

Hire'in AI

Remote

April 2024 – Present

- Defined and implemented QA and CI/CD strategy for GPT-based job search platform, aligning with weekly sprints.
- Built modular Functionize AI framework for UI, API, and analytics automation, improving test coverage by 80%
- Orchestrated stakeholder alignment across security, architecture, and data governance to support responsible AI validation
- Led RCA reviews, defect triage, and metrics reporting using JIRA and Confluence, reducing production bugs by 40%
- Participated in technical design and planning meetings to embed QA from inception and avoid any cross-conflicts for development.

Sr. QA and Program Manager

Abbott

Alameda, CA

Feb 2023 – Sept 2023

- Partnered with Product and Engineering to define AI use cases, assign IT resources, track KPIs, and maintain the use case master file for execution transparency
- Performed anomaly detection, security, and bias testing on CGM device software, improving defect predictability by 35%
- Built dashboard and reporting workflows in JIRA and Confluence to drive executive visibility and traceability

Sr. QA and Program Manager

Mathison

Remote

Jan 2022 – Jan 2023

- Led GenAI test automation using Functionize AI to achieve 90% regression coverage and cut manual QA effort by 60%
- Managed enterprise AI use case governance for resume matching, bias detection, & DEI analytics, aligning with business KPIs
- Conducted vendor evaluations and POCs, influencing leadership to adopt scalable GenAI solutions for quality and fairness audits.
- Documented test architecture, workflows, and integration patterns to scale quality across teams

Sr. QA and Program Manager

Edmodo

Remote

Jul 2019 – Jan 2022

- Rolled out AI-powered quiz generation tool for K–12 platform, impacting 5M+ users and reducing teacher workload by 40%
- Defined QA strategy and sprint deliverables for ML-based assignment validation workflows, ensuring accuracy and security
- Partnered with Legal and Product to implement COPPA and FERPA aligned AI testing standards for student data protection
- Managed QA hiring, mentoring, and technical alignment with product delivery goals
- Designed and implemented test automation for progressive web and mobile platforms using Cypress, WebdriverIO, and Appium

Lead QA Engineer

Wells Fargo, Walmart Labs, McKesson, First Republic Bank, American Airlines

California

Mar 2012 – Jul 2019

- Reported pilot outcomes via dashboards and retrospectives, securing continued funding for innovation and research
- Developed manual and automation test suites for API, web, and mobile using various tools and technologies.

Education & Certifications

- Bachelor of Engineering, **Computer Science** – M.S. Ramaiah Institute of Technology, India (2011)
