Head of QA / Quality Engineering Leader | 0→1 Automation & TestOps | Healthcare & Regulated Systems

PROFESSIONAL SUMMARY

QA/Quality Engineering leader with 13+ years of experience and 6+ years in people management, building and scaling automation, test operations, and release-quality programs across fast-moving startups and regulated healthcare products. Known for 0→1 framework ownership, raising automation reliability, embedding quality into CI/CD, and partnering cross-functionally with Engineering, Product, and clinical/regulatory stakeholders to ship safely and quickly.

CORE SKILLS

Automation & Frameworks: Playwright (verify/insert details), Cypress, WebdriverIO, Selenium, Appium; AI-assisted validation/testing

API Testing: Postman, Swagger, SOAP UI, Charles Proxy; contract/negative testing; troubleshooting across services

CI/CD & TestOps: GitHub Actions, CircleCI, Jenkins, Azure DevOps; flaky test triage, dashboards, quality gates, release readiness

Platforms: Microservices, Docker, Kubernetes; SQL/NoSQL; iOS/Android testing

Monitoring/Observability: Datadog, New Relic, Sentry, Splunk (for release health and defect diagnosis)

Leadership: Hiring, mentoring, org design, resource planning, KPIs/OKRs, stakeholder management; global teams up to 25

PROFESSIONAL EXPERIENCE

Abbott (via Hire'in Solutions) | Product Engineering Manager - Quality & Release

Feb 2023 - Present

- Owned quality and release strategy for CGM (continuous glucose monitoring) integrations across Android/iOS apps; drove end-to-end test planning, execution, and go/no-go readiness.
- Designed compliance validation plans aligned to FDA QSR and 21 CFR expectations; strengthened traceability and audit readiness for regulated releases.
- Automated CI/CD checks and release workflows, reducing deployment cycle time by 25% while improving confidence in production rollouts.
- Established KPI-driven quality operations (defect trends, cycle time, automation health), improving defect resolution speed by 20%.
- Partnered with cross-functional engineering and product stakeholders to resolve high-severity issues quickly and prevent recurrence via test hardening.

Mathison | Head of QA & Program

Jan 2022 - Jan 2023

- Built QA function and automation approach from scratch (0→1), aligning test strategy to fast release cadence and business risk.
- Delivered 90% regression automation coverage and reduced release issues by shifting critical workflows to automated checks.
- Integrated automated suites into CI/CD pipelines, improving feature rollout speed by 30% and reducing manual verification burden.

- Led GenAI-based test automation strategy/POCs to expand coverage and accelerate test creation while maintaining quality standards.
- Created hiring plan, mentorship structure, and operating rhythms to scale a high-output QA team.

Edmodo | Senior Manager - QA & Program

Jul 2019 - Jan 2022

- Led a 25-person QA and program team; implemented data-driven automation program reaching 85% regression coverage.
- Introduced CI/CD branching and release strategies, reducing production rollbacks by 95% and improving release stability by 30%.
- Established API quality engineering standards and security testing strategy; improved defect discovery earlier in the lifecycle.
- Defined QA KPIs (defect density, execution efficiency, automation ROI) to increase predictability and engineering confidence.
- Scaled test operations via resource planning, budgeting, and hiring to match product growth and delivery goals.

Wells Fargo | Walmart Labs | First Republic Bank | McKesson | American Airlines | Senior QA Engineer (Various Roles)

Earlier Career

- Delivered end-to-end testing for high-traffic, high-risk systems (banking, payments, healthcare, and consumer platforms), focusing on reliability and user trust.
- Built automated mobile and web regression suites (up to 80% automation coverage) and improved defect triage and resolution workflows by ~20%.
- Executed API, integration, and compliance-focused testing to support secure and stable releases in regulated environments.

EDUCATION & CERTIFICATIONS

B.E. in Computer Science & Engineering | MS Ramaiah Institute of Technology (MSRIT), Bengaluru, India

Wharton Executive Education (2024) - Product Management & Strategy | PSM II (Professional Scrum Master II)

TARGET FIT - SULLY.AI (HOW I'LL START)

- Weeks 1-4: Define QA strategy (risk-based coverage across UI/API), stand up Playwright framework + reporting, and automate top clinical/admin workflows.
- Days 30-90: Integrate reliable CI gates in GitHub Actions, reduce flakiness via TestOps dashboards, and scale coverage with a hiring/mentorship plan.
