AI Tools We Leverage

Including Kleriq AI for job analysis, matching & screening

Resume Parsing & Analysis

AI scans and structures candidate resumes to extract skills, experience, and role fit in seconds.

Job Description Matching

Semantically aligns job requirements to candidate profiles — far beyond simple keyword search.

Candidate Pre-Screening

AI-driven screening conversations that qualify candidates at scale before human review.

Bias-Free Shortlisting

Evaluates candidates purely on skills, experience, and role fit — removing demographic bias.

Fit Scoring & Ranking

Dynamic candidate ranking updated in real time as new information is captured through the pipeline.

Why AI-Assisted Hiring Wins

By partnering with leading AI tools, we bring enterprise-grade intelligence to every search — delivering better candidates, faster.

AI-Assisted Matching

We leverage best-in-class AI tools to parse, score, and rank candidates with precision — reducing mis-hires and cutting time-to-shortlist by up to 70%.

☆ **70% Faster Shortlisting**

IT Domain Experts

Every recruiter on our team is an IT-specialist. We speak your tech stack fluently — from Java to Kubernetes, from React to SAP.

☆ **60+ IT-Only Recruiters**

Compliance-First

Built-in US compliance workflows covering I-9 verification, E-Verify, background checks, and federal/state employment law — so you hire with zero legal risk.

☆ **Zero-Risk: I-9 + E-Verify**

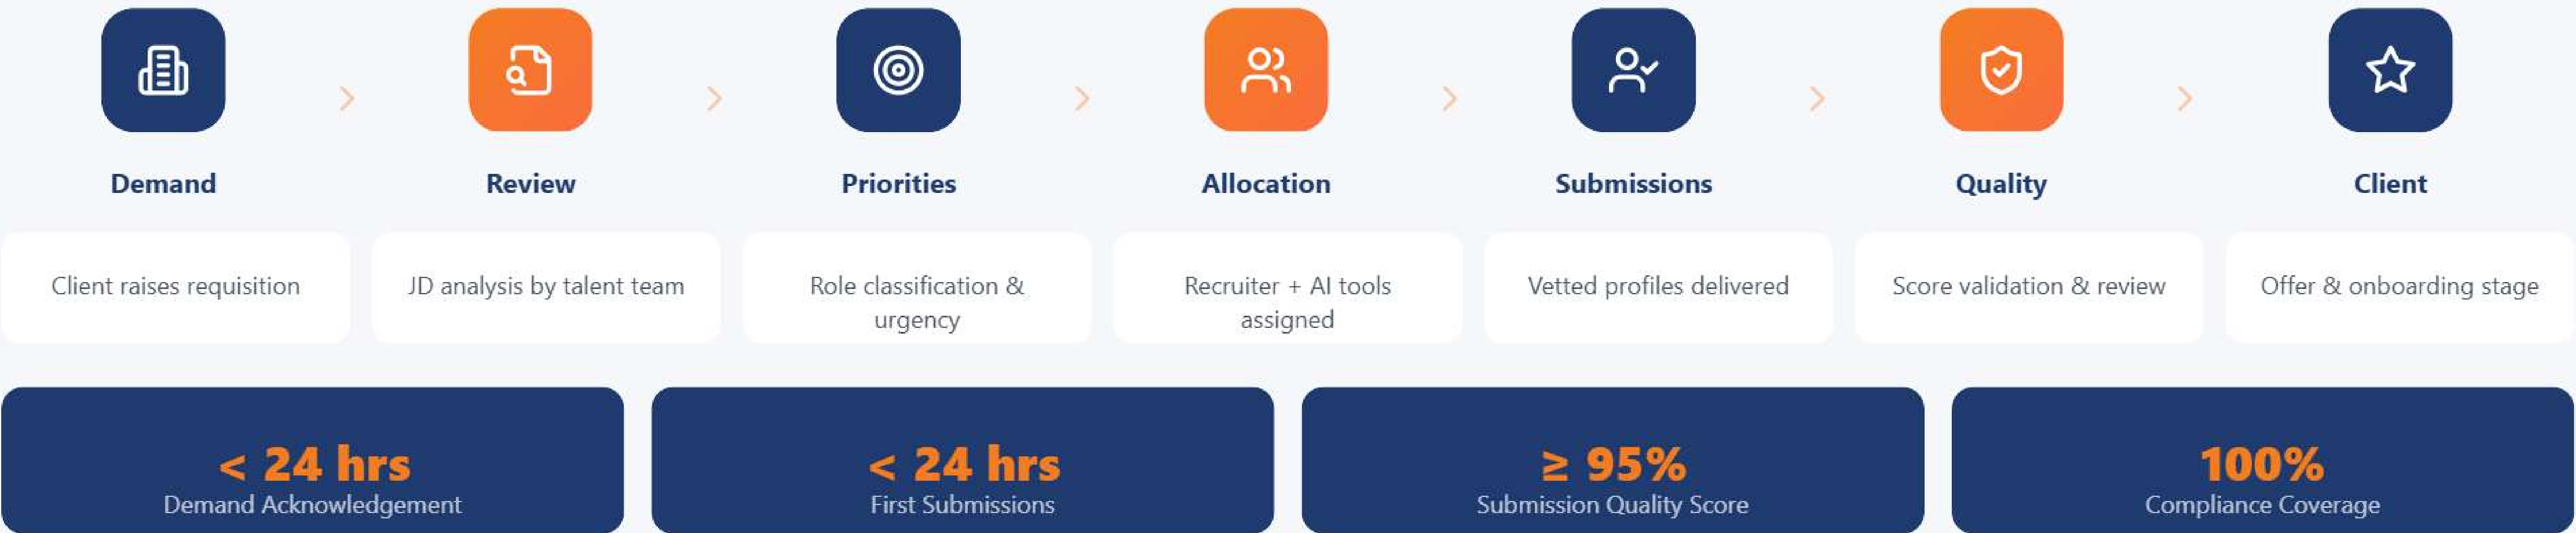

Fastest Time-to-Fill

With AI-assisted pre-screening running continuously, we deliver qualified submissions in as few as 24 hours for most IT roles.

☆ **First Profiles in 24 Hours**

 **AI-powered tools** are active throughout the pipeline — continuously scoring, ranking, and surfacing the best-fit candidates automatically.
